EXPERIENCE

Data and Analytics Engineer with 6+ years designing cloud data warehouses and golden-table architectures for global banking institutions and digital-asset platforms. Built data and compliance infrastructure supporting complex financial and regulatory environments worldwide. Deep command of the modern data stack end to end — from AWS and dbt to Snowflake and Kubernetes — with a focus on MLOps, process automation, and fraud analytics.

Sapiens Management & Technologies — Founder & Lead Engineer

Nov 2025 – Present

Belo Horizonte, Brazil

- Boutique data consultancy contracted by international enterprises and global digital-asset firms to design, scale, and optimize mission-critical data platforms and analytics infrastructure.
- Specialize in modern data stack deployment (AWS, dbt, Snowflake, Kubernetes), financial ML infrastructure, and production-grade automated tracking pipelines under strict global compliance constraints.
- Own end-to-end SLA and delivery management — aligning data strategy with cross-functional business requirements to drive operational cost efficiency.

Kraken — Analytics Engineer / Data Consultant

Nov 2025 – Present

Tier-1 global digital-asset platform · engaged via Sapiens Management & Technologies

- Built production-grade data pipelines and analytics solutions for high-volume financial and regulatory workflows in a global digital-asset environment.
- Designed reusable data models and curated datasets that improved consistency, reliability, and access to trusted business data.
- Automated recurring reporting and operational processes, reducing manual effort and improving delivery reliability.
- Developed AI-powered workflow agents to streamline scheduling coordination, task routing, and multi-step operational processes.
- Partnered with compliance, operations, analytics, and engineering stakeholders to translate complex requirements into maintainable data products.

Banco Mercantil — Data Scientist (Promoted from Intern / Fraud Analyst)

Nov 2019 – Nov 2025

Belo Horizonte, Brazil

- Progressed over 6 years from intern to Data Scientist within the fraud-prevention org, moving from transactional pattern analysis into building and owning the bank's fraud-detection infrastructure end-to-end.
- Built and maintained institutional transaction-monitoring systems (PIX, TEDs) and KPI/Power BI dashboards; created and governed tables, views, tasks, and procedures in Snowflake using Python, DBT, and SQL.
- Designed transactional fraud-prevention algorithms and trained predictive ML/AI fraud models, accelerating case-resolution speed by 30%+; monitored anomalies across fraud pipelines using statistical methods.
- Developed and orchestrated autonomous AI/MLOps agents, and automated workflows using agile practices integrated with DevOps platforms.

Corporate Gestão Empresarial — Data Consultant (Advisor)

Aug 2018 – Present

Greater Belo Horizonte

- Technical Liaison & Product Alignment: Act as the strategic liaison between commercial stakeholders and engineering,

translating complex business requirements into technical product roadmaps and platform features.

- Operational Efficiency & QA: Oversee workflow automations, and data-driven operational improvements to streamline business administration.

EDUCATION

FIAP — Postgraduate Specialization (Lato Sensu), Machine Learning Engineering	Feb 2025 – Feb 2026
Pontifícia Universidade Católica de Minas Gerais — Postgraduate Specialization (Lato Sensu), Management & Strategic Data Analysis	Aug 2022 – Oct 2023
Pontifícia Universidade Católica de Minas Gerais — Major, Business Administration	Jan 2018 – Dec 2021
Fast MBA — Distance Learning, Entrepreneurship , Business and Startups	2020

SKILLS & CERTIFICATIONS

Top Skills: Cloud Data Architecture, Financial ML Infrastructure, Autonomous AI/MLOps Agents, LLM Local Deployment.

Core Stack: Python, SQL, AWS, dbt, Snowflake, Kubernetes, Hex, Power BI, Airflow

Specialties: Golden Table Architecture, Cloud Data Engineering, Data Democratization, Cross-Border Regulatory Compliance, Process Automation, MLOps, Fraud Analytics

LANGUAGES

Portuguese — Native / Bilingual

English — Full Professional
